DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- a. Perfluoropropene
- b. Perfluorobutene
- c. Perfluoropentene
- d. Perfluoro-2-methylbutene
- e. Perfluoro-cyclopropene
- f. Perfluorocyclobutene
- g. Perfluorocycloheptene
- h. Perfluorocyclooctene
- i. Perfluoro-(1-methylcyclobutene)
- j. Perfluoro(3-methylcyclobutene)
- k. Perfluoro-(1-methylcyclopentene)
- l. Perfluoro(3-methylcyclopentene)

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 1774

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claim 1: a. – 1.

Claim 2: a. – 1.

Claim 3: a. – 1.

Claim 4: a. – 1.

Claim 5: a. – 1.

Claim 6: a. – 1.

Claim 7: a. - 1.

Claim 8: a

Claim 9: b

Claim 10: c

Claim 11: d

Claim 12: e

Claim 13: f

Claim 14: (it is noted that claim 14 is indefinite, because perfluorocyclopentene is not recited in claim 1); none of the species correspond to dependent claim 14. (It is noted that if applicant amends claim 1 to include perfluorocyclopentene as recited in indefinite claim 14, perfluorocyclopentene would then also be considered to be a separate species of the invention in addition to species a. – 1. listed above.)

Claim 15: g

Claim 16: h

Claim 17: i

Claim 18: j

Claim 19: k

Claim 20: l

The following claim(s) are generic: Claims 1-7.

Art Unit: 1774

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature of the present invention – a perfluoroolefin decomposition polymer of a specific perfluoroolefin – does not define a contribution over the prior art, as is revealed by Nakamura et al. (US patent no. 5,427,858), which discloses a polymer film formed by CVD that includes perfluoro comonomers such as perfluoropropene for a protective layer of an EL device (see title, abstract, col. 3, lines 52-62, col. 4, lines 31-32, col. 7, lines 3-4, col. 5, lines 4-6). Consequently, a lack of unity exists. See 37 CFR 1.475 and MPEP 1850.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1774

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dawn Garrett whose telephone number is (571) 272-1523. The examiner can normally be reached Monday through Friday.
